Profile

I'm a budding creative technologist and designer who loves to work at the intersection of visual communication, interactivity and technology. As a graduate student of Design & Technology, I create algorithmic and data driven designs that are visually impactful, and model complex systems as 3D games and XR environments to generate systems literacy. I am seeking a summer internship where I can bring my unique problem-solving skillset to the table and push my creative boundaries.

Experience

Programmer Analyst, Cognizant Technology Solutions, Mumbai, Dec'16-Jun'19
On-site consultant for Kotak Life insurance, India HQ.
Microsoft SharePoint web-designer, .NET developer and database engineer.
